

A Family of Attached Polyurethane Cushions

Polyurethane Precoat & Foam with Woven Scrim

Lex II EH - A polyurethane precoat with a high density polyurethane cushion attached to a woven scrim designed for medium traffic areas such as hotel/motel rooms, retail shops, small stores, etc. Cushion Density of 15 lbs/ft³, Tuft binds normally 10-15 lbs

Lex III EH - For heavy traffic use, a higher polyurethane precoat weight with a higher density polyurethane cushion attached to a woven scrim for use in areas such as banks, restaurants, schools, office buildings, supermarkets, churches and hotel/motel lobbies and corridors. Cushion Density of 20 lbs/ft³, Tuft Binds normally 20 lbs.

Polyurethane Foam Over Latex

Lex 20 TR - A high density polyurethane cushion (20 lb/ft³) with woven scrim attached to a finished commercial carpet.

Lex 24 KT - A high density polyurethane cushion (24 lb/ft³) attached to a finished commercial carpet for heavier rolling traffic use.

Lex 30 KT - An ultra-high density polyurethane cushion (30 lb/ft³) attached to a finished commercial carpet for extra heavy traffic use.

Dynaback - A High density (20 lbs./sq. ft.) polyurethane cushion is attached to a finished commercial carpet, providing for improved face fiber wear. Dynaback Plus adds a woven scrim to the cushion, which allows for easy removal when carpet is replaced.
